Yvonne Schulman, DVM

Dr. Schulman completed her undergraduate degree at Harvard University and is a graduate of Tufts University School of Veterinary Medicine. She was in small animal practice prior to completing a residency in pathology at Angell Memorial Animal Hospital in Boston, MA and a residency in pathology at the Smithsonian Institution's National Zoological Park in Washington, DC. After her residencies, Dr. Schulman was awarded a fellowship at the Armed Forces Institute of Pathology (AFIP) in Washington, DC, where she was subsequently hired as a staff pathologist and appointed Head of the WHO Collaborating Center for Worldwide Reference on Comparative Oncology. Dr. Schulman became a diplomate of the American College of Veterinary Pathologists in anatomic pathology in 1992 and has worked for Marshfield Labs Veterinary Service since 1993.

Author of Veterinarian's Guide to Maximizing Biopsy Results. This book helps veterinary practitioners to submit high quality biopsy samples, maximizing the results and minimizing the costs. With detailed practical guidance on each step of the biopsy collection and submission process, this book helps veterinary clinicians and surgeons avoid errors that compromise the diagnostic quality of biopsy specimens. Offering dos and don'ts for each stage of the process, this user-friendly manual is designed for frequent reference prior to and during biopsy collection and submission.
